## EXPERIENCE

### **Ingredient1**

*Marketing and Data Analysis Intern* | Sep. 2015 - February 2016

- Analyzed user trends and content on social media through data analysis in Python
- Researched major nutrition and health-related topics extensively for app/website content
- Provided customer service by addressing consumer concerns and questions and dealt with consumer outreach

### **Green Commission**

*President* | Jan 2013- Jun 2015

- Formulated a solar panel business solution to harness solar energy in a high school parking lot
- Presented financial payback, environmental benefits, and design blueprints of the solar panel project to school district board
- Organized the annual Green Summit, educating school community on environmental awareness

### **Speech and Debate**

*Captain* | Aug 2011- June 2015

- Wrote and delivered 10-minute speeches on US Education Reform, Impact of Social Media in Society, Impact of Euphemisms in Conversation, and the Benefits of a Liberal Arts Education
- Performed, reinterpreted, and acted out monologues by Maysoon Zayid, Arab Comedian with cerebral palsy, Kakenya Nytia, Kenyan education entrepreneur, and Nick Vujicic, motivational speaker with tetra amelia syndrome.
- Reached Final Round of 2014 California State Championships in Oratorical Interpretation, Double Championed at Coast Forensic League Individual Events Tournament, Won Santa Clara University Tournament, Won Martin Luther King Invitational

### **Stanford Girl Code**

*Student* | Summer 2014

- Worked on Java coding challenges in a highly intensive all women's environment
- Met Silicon Valley companies and industry experts at Yahoo, Microsoft & Palantir
- Selected from a highly competitive applicant pool and recommended by high school administration

## PROJECT DEVELOPMENT

### **Mobile Exercise • May 2015**

- Developed an Android health and wellness app, alongside two team members, that helps individuals find exercises on-the-go to help themselves stay active.

### **Data Analysis of Diet-Related Tweets • November 2015**

- A data exploration in Python that analyzed tweets with the hashtags #DairyFree, #GlutenFree, #Vegan, & #Paleo to create a map visualization to determine where people were tweeting most about these respective hashtags and an analysis of the most common foods tweeted about amongst all four diets using cosine similarity.
